

## FAQ Questions

**Q - How much do you advise homeowners to invest in front door?**

**A -** We usually ask homeowners to calculate their investment based on the value of their home. The average homeowner spends 1 - 1.5% of the value of their home on their front door. So in a \$500,000 home, the homeowner might spend up to \$7500 on a custom door and entry system.

**Q - What is the price range of your doors?**

**A -** Since all our doors are custom, we can only provide an accurate quote once we have the exact dimensions. However, we have several doors which are 2' 10" x 6' 8" in mahogany grain that start at \$2750 (door slab only).

**Q - Your doors seem more expensive than the ones I've seen at some of the big hardware stores. Why?**

**A -** Great question. Here are a few differences between our JELD-WEN IWP® Aurora door systems and hardware store doors. Aurora systems:

- Are custom products.
- Are almost virtually maintenance free.
- Have an extended warranty.
- Include a finished frame and casing with exterior and interior stain selection.

**Q - How do I care for JELD-WEN IWP® Aurora door?**

**A -** Your new door is like a piece of fine furniture. We provide each customer with a clean and care kit that you can use to keep your door looking beautiful. If damage does occur to your door, after installation, we will assist you in commissioning a professionally trained craftsman to restore your door at a very competitive rate.

**Q - What is a DIN?**

**A -** Each JELD-WEN IWP® Aurora door receives a Door Inspected Number. We keep this number on file so we have a complete record of the stain, wood grain and style. If your door does require any warranty work we know exactly how to best service you.

**Q - What if I want a wood door?**

**A -** Statements also carries custom Jeld-Wen IWP® wood doors.
